Your digital strategy in action: Make your HR tech work.

The HR digital landscape has become increasingly complex and challenging. With WalkMe, HR leaders can maximize the ROI of their HR technology by driving impactful digital experiences based on actionable data and analytics.
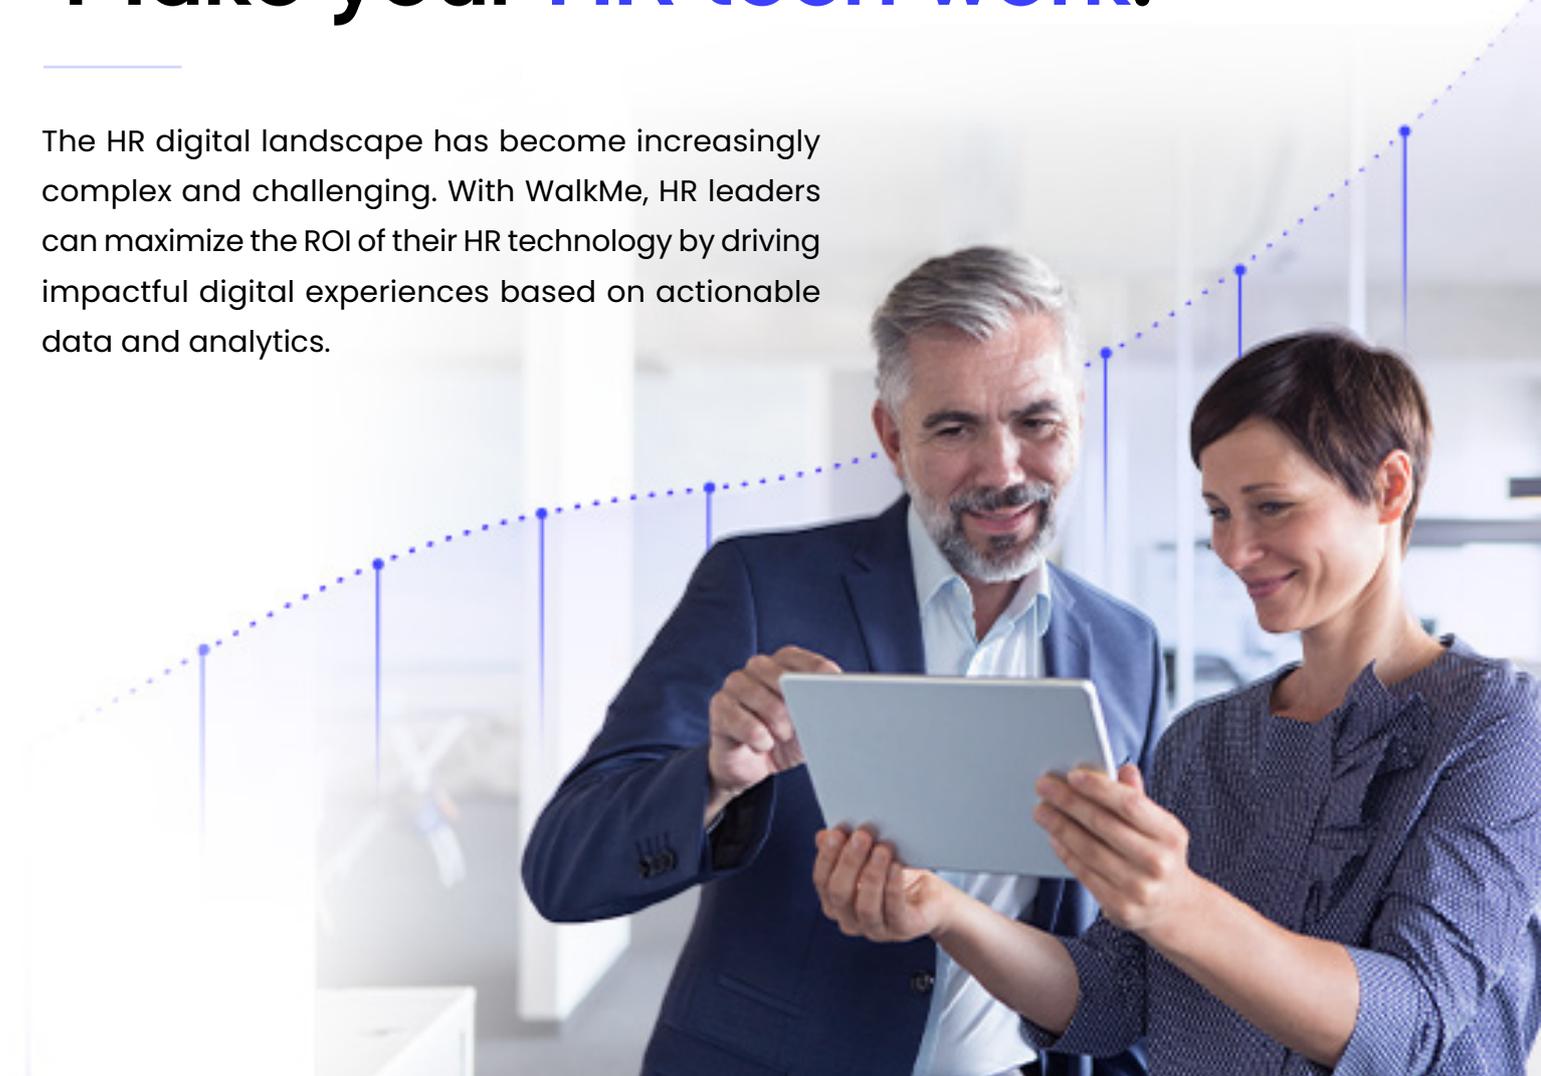

According to Gartner®, by 2024,

60% of large global organizations will try to address employee experience needs by deploying at least five HCM and digital workplace technologies.

Visibility into software usage and effective digital adoption strategies are critical to enhancing employee experience and optimizing the value of strategic HR digital investments.

With WalkMe's Digital Adoption Platform, measure and drive digital adoption across the organization. Ensure users are productive and efficient across the employee lifecycle.

Develop and execute human resource strategy

With WalkMe, gain full visibility into the HR tech stack and an understanding of where users are struggling. Using this data, drive users to success with personalized experiences across any workflow or device through guidance, hyper-automation, and in-app engagement.

- Gain **visibility** into the right data to drive strategic decisions.
- **Optimize app spend** and increase **software ROI.**
- **Overcome global barriers** from language to location and policies range.
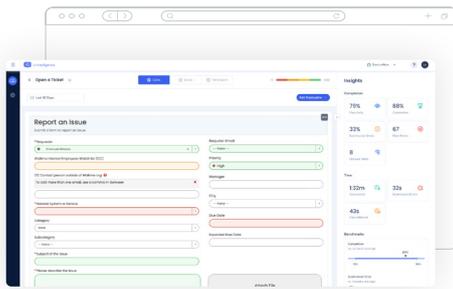

Gain visibility and leverage data to drive change.
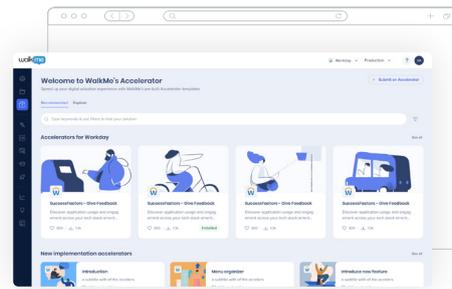

Design frictionless workflows based on best practices.
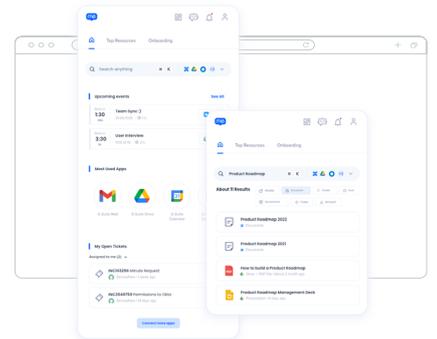

Create experiences that transform how work gets done.
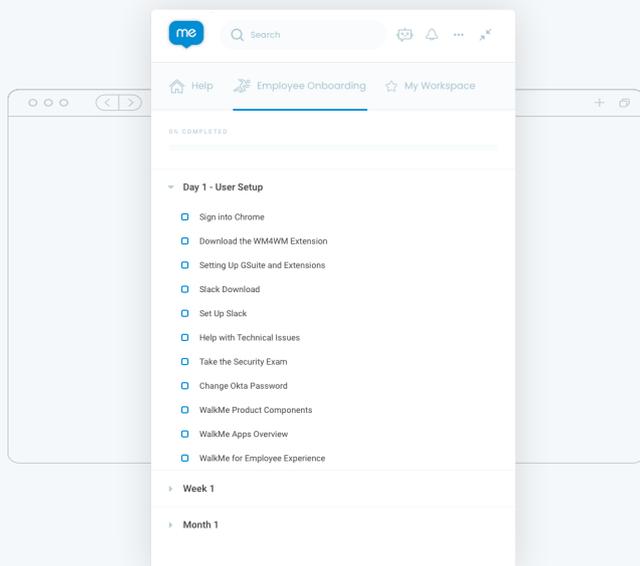

Manage the employee lifecycle

With WalkMe, HR technology becomes a seamless part of your employees' day - whether they are new to the org or a seasoned manager - without having to rely on dedicated training or support.

- Accelerate **onboarding and training** by reducing support, time spent, and costs.
- Monitor employee **compliance** with global policies.
- Optimize productivity and efficiency of employees, managers, and HR staff across **employee lifecycle** events.

Drive operational excellence

With WalkMe, connect employees to workflows and any HR application with dedicated search, easy access to recent tasks and resources, personalized onboarding experiences, and self-service support from anywhere.

- Maintain **business continuity** through any change.

- Implement the right procedures and support that caters to a **hybrid workforce**.

- Decrease **IT support** by promoting self served users.
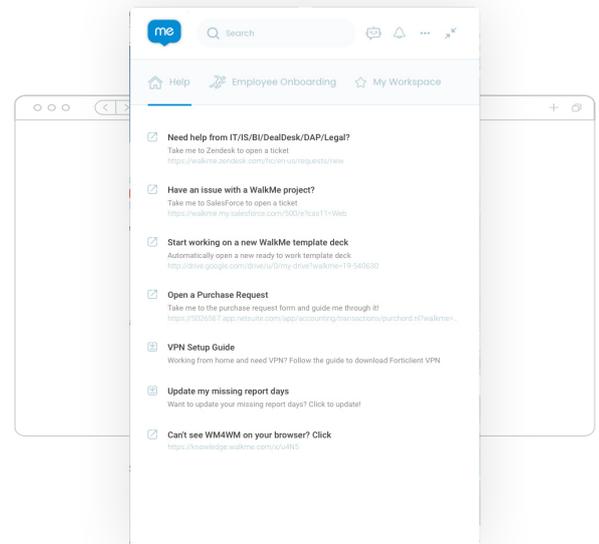

With WalkMe HR teams can:

Improve employee experience
Increase employee productivity on and across applications with no-code automation and guidance.

Optimize operational productivity and efficiency
Communicate with and drive employees to action with updates and calls to action directly on their desktop, mobile, or web applications.

Ensure data integrity and compliance
Prevent errors with proactive alerts and automation across applications to mitigate risk and adhere to compliance regulations.

Bridge the gap of hybrid work environments
Keep employees engaged in remote or hybrid work environments by reaching them directly on their desktops.

Connect HR transformation to business goals
Understand software usage and user experiences across applications and business processes to implement data-driven solutions.

Manage the complexity of digital transformation by leveraging data to drive user experiences.

Create data-driven experiences.

Gain visibility into the tech stack as you measure, drive, and act to ultimately maximize the impact of your digital transformation strategy.
